

Activating “Developer” on our menu bar

We could not find “Developer” on our menu bar, see below.

We do the followings: click “File” - -> “Options”, on the bottom of the left-hand side, see the left panel below. Then click “Customize Ribbon”, see the middle panel below. Finally, check the “Developer”, see the right panel below.

After click “OK”, the “Developer” appear on my menu bar.
